Garden Tips:

-All bulbs are super easy to plant, and it's fun to do with kids! Just dig a small hole, pop the bulbs in, and pat the dirt back in place. Done!

-Squirrels tend to like eating tulips, so if you live in an area with a lot of squirrels, you may want to try sprinkling lots of red pepper flakes or powder on the bulbs and in the hole when you plant them. Or, you can keep them inside your house and force them in vases, or you can try planting cheerful daffodils and impressive alliums instead!

-Grecian windflowers are small but bright, and they bloom for a long time. They often do particularly well under bushes and are great for little spots that need brightening.

Sale Ends October 15th

50% of your sale goes to help the BDS Parents Association
